Software Engineer Intern

Software engineer intern with over 3 years of experience writing and testing code, helping develop software system solutions, and updating companies' knowledge using the latest development tools. Well-skilled in software development life cycle, including requirement analysis, design, development, and production support. Key achievement: collaborated with a 5-member team to release a new system suite, saving the company \$21K in monthly QA costs.

WORK EXPERIENCE

Software Engineer Intern

November 2020 – Present

Resume Worded, New York, NY

- Assisted in developing a CRM software upgrade that saved an annual budget of \$80K, improving customer service by 73%.
- Streamlined 17 existing applications for a more intuitive workflow; reduced interface complexity by 92%.
- Collaborated with a 5-member team to release a new system suite, saving the company \$21K in monthly QA costs.
- Partnered with 11 supervisors to develop tools that reduced debugging time by 72%, saving engineers from repetitive tasks.

Software Developer

February 2019 – October 2020

Growths, San Francisco, CA

- Devised 14 web applications using PHP/MySQL framework, increasing site traffic by 80% within the first month.
- Introduced an automated system for deploying software updates across 29 servers, reducing deployment time from 5 days to 24 hours.
- Conceived a new system that tracked and analyzed 18TB of customer data, increasing sales by 67% QoQ.
- Develop[ed] scripts that automated tasks such as database backups and restores, and server provisioning, saving approximately 72 person-hours weekly.

Computer Technician

June 2018 – January 2019

Resume Worded's Exciting Company, New York, NY

- Created an automated system that tracked the time cards of 3K employees, saving the company 72 hours per week in payroll processing.
- Installed and configured new computer hardware, software, printers, and networking equipment for 2K clients
- Maintained a detailed inventory of all computer parts in the warehouse worth over \$220K
- Updated security patches on 1.5K computers, preventing malware attacks within 13 weeks on the job.
